Executive Summary

Enthusiastic and driven Fresh Graduate in Computer Science and Business Systems with expertise in Full Stack Development, Generative AI, and modern web technologies. Skilled in Java, Python, JavaScript, React.js, and Node.js with practical experience from internships and innovative real-world projects. Demonstrated project leadership, team management, and problem-solving abilities with a strong passion for creating impactful digital solutions. Quick learner with excellent communication and collaboration skills, eager to contribute to dynamic organizations and grow as a technology professional.

Technical Skills

Languages: Java, Python, JavaScript

Frameworks/Libraries: React.js, Node.js, Pandas, Numpy, Matplot, Flutter

Tools: Git, GitHub, Antigravity, Android Studio, Visual Studio Code

AI/ML Technologies: Generative AI, YOLOv8, DeepFace, Prompt Engineering

Cloud Computing: AWS

DataBase: MySQL

Professional Experience

EduSkills Foundation, India

Dec 2025 – Mar 2026

Role: MERN Full Stack Development Intern

Responsibilities:

- Developed full-stack web applications using MongoDB, Express.js, React.js, and Node.js
- Built RESTful APIs and integrated backend services with frontend applications
- Implemented CRUD operations and optimized database interactions
- Designed responsive user interfaces using React.js components
- Collaborated on project development and debugging activities in a virtual internship environment
- Applied version control practices using Git and GitHub
- Improved frontend responsiveness and usability across devices
- Participated in testing and deployment of web application modules

Impact:

- Successfully completed a structured MERN Full Stack internship program
- Delivered multiple functional full-stack modules during the internship
- Improved understanding of scalable web application architecture
- Strengthened practical experience in frontend and backend integration

IAHV, India

Sep 2025 – Dec 2025

Role: GenAI Training and Intern

Responsibilities:

- Learned and applied Generative AI concepts including LLM workflows and prompt engineering
- Built AI-based applications using modern AI tools and frameworks
- Optimized prompts to improve response quality and relevance
- Assisted in testing AI model outputs and improving workflow efficiency
- Explored AI automation techniques for practical applications
- Collaborated on AI experimentation and implementation tasks
- Studied model optimization techniques for improved accuracy and speed
- Worked on integrating AI tools into application workflows

Impact:

- Improved AI response accuracy and workflow efficiency through prompt optimization
- Gained hands-on experience in Generative AI application development
- Enhanced understanding of AI-powered automation systems
- Successfully completed industry-focused AI training and internship program

Role: Web Development Intern

Responsibilities:

- Developed responsive web components using HTML, CSS, and JavaScript
- Assisted in building client dashboard interfaces and UI modules
- Collaborated with team members during Agile sprint activities
- Used Git for version control and collaborative development
- Participated in debugging and frontend issue resolution
- Improved webpage responsiveness and cross-device compatibility
- Contributed to frontend design enhancements and implementation
- Supported project delivery timelines through collaborative development

Impact:

- Delivered responsive UI components for client-facing applications
- Improved collaboration efficiency through Git-based workflows
- Gained practical experience in Agile software development practices
- Enhanced frontend development and debugging capabilities

Projects

FinAIMT – High-Performance FinTech Ecosystem

Ongoing

Responsibilities:

- Developed an AI-driven financial co-pilot platform with Flutter frontend integration
- Implemented Clean Architecture principles using Riverpod state management
- Built visualization modules using custom FL Charts for Indian financial assets
- Integrated automated investment advisory workflows
- Developed tax calculation modules for Section 80C compliance
- Worked on backend integration for financial analytics processing
- Improved application scalability and modular architecture
- Designed responsive and user-friendly financial dashboards

Impact:

- Created a scalable fintech ecosystem integrating AI-driven advisory systems
- Improved visualization and accessibility of investment-related insights
- Enhanced tax compliance automation for financial planning workflows
- Strengthened expertise in Flutter and AI-integrated application development

Goshin-Ryu Karate-Do Platform – Modern Martial Arts Ecosystem

Ongoing

Responsibilities:

- Contributed to development of a digital platform for martial arts ecosystem management
- Assisted in frontend and backend integration workflows
- Supported responsive UI development and platform optimization
- Participated in feature planning and implementation processes
- Worked on scalable application structure and architecture
- Collaborated with development teams for functionality enhancement

Impact:

- Improved digital accessibility for martial arts platform management
- Strengthened collaborative software development experience
- Enhanced application scalability and usability

SecuritySentinel – AI-Powered Weapon and Threat Detection System

Apr 2026

Responsibilities:

- Developed a real-time threat detection system using YOLOv8 object detection
- Integrated DeepFace behavioral biometrics for facial analysis
- Built a Multi-Factor Threat Matrix for dynamic threat assessment
- Developed Flask-based backend services for automated monitoring
- Designed automated forensic alert systems using encrypted SMTP workflows

- Implemented Glassmorphism-based UI for improved monitoring experience
- Optimized threat detection sensitivity using facial emotion analysis
- Assisted in deployment and testing of AI surveillance workflows

Impact:

- Built an AI-powered surveillance platform for automated threat monitoring
 - Improved threat assessment efficiency through multi-factor analysis
 - Enhanced real-time detection accuracy using AI-driven workflows
 - Strengthened expertise in computer vision and AI security systems
-

Education

Under Graduate

B.Tech in Computer Science and Business System

Mohamed Sathak A.J. College Of Engineering, Chennai, TamilNadu

CGPA: 7.8 / 10

Chennai, Tamil Nadu

2022 – 2026

Higher Secondary Education

Avichi Higher Secondary School

Percentage : 69

Chennai, Tamil Nadu

2020 – 2022

Secondary Education

Bharathi Matriculation Higher Secondary School

Percentage : 75

Chennai, Tamil Nadu

2019 – 2020

Certifications

- Python, JavaScript, BootStrap, Mysql — Spoken Tutorial at IIT Bombay
 - Java — Beasant Technologies
 - Git GitHub — Simplilearn
 - Gen AI — IAHV
-

Achievements

- Won 1st place in IIT Madras for Shaastra Techathon- AI/ML Challenge (2024)
 - Top 5 finalist in Technoxion (World Robotics Championship)- Fastest Line Follower (2024)
 - 50+ coding practice problems solved on LeetCode
-
