PROFESSIONAL SUMMARY

B.Tech graduate in Computer Science and Business Systems (2026) with hands-on experience across four internships spanning full-stack MERN development and Generative AI / LLM engineering. Built and shipped production-style full-stack applications using MongoDB, Express.js, React.js, and Node.js; architected and integrated RESTful APIs; and applied prompt engineering and LLM workflows to real-world AI prototypes. Proficient in Java, Python, and JavaScript, with working knowledge of MySQL, MongoDB, and SQLite. Holds 15+ verified technical certifications across web development, AI, and cloud tools. 1st Place winner, IIT Madras Shastra Techathon AI/ML Challenge (2024).

TECHNICAL SKILLS

Programming Languages: Java, Python, JavaScript

MERN / Web: React.js, Node.js, Express.js, MongoDB, RESTful API Design, HTML5, CSS3, JavaScript (ES6+)

Generative AI: Large Language Models (LLM), Prompt Engineering, YOLOv8, DeepFace

Databases: MongoDB, MySQL, SQLite

Data & Libraries: Pandas, NumPy, Matplotlib

Mobile: Flutter, Android Studio

Cloud & DevOps: AWS, Git, GitHub, Version Control

Tools: Visual Studio Code, Antigravity

Core Competencies: Full-Stack Development, API Integration, Team Leadership, Problem Solving, Agile Collaboration

PROFESSIONAL EXPERIENCE

MERN Full Stack Development Intern | EduSkills Foundation, India

Dec 2025 – Mar 2026

- Engineered full-stack web applications end-to-end on the MERN stack (MongoDB, Express.js, React.js, Node.js), taking features from schema design through production-ready UI.
- Architected and integrated RESTful API endpoints linking backend services to the React.js frontend for reliable, low-latency client-server data flow.
- Optimized CRUD operations and MongoDB query structure/indexing, improving response times across core data modules.
- Built responsive, reusable React.js UI components, improving cross-device usability and reducing UI-related defects.
- Used Git/GitHub for version control in a collaborative team setting, supporting debugging and deployment across multiple sprints.

Generative AI Training and Internship | IAHV, India

Sep 2025 – Dec 2025

- Applied Generative AI concepts, including LLM workflows and prompt engineering, to design and build functional AI-based application prototypes.
- Refined and tested prompts across multiple use cases and evaluation criteria, improving model response accuracy and consistency.
- Tested and evaluated AI model outputs against defined benchmarks, contributing to measurable gains in speed and accuracy.

Backend Web Development Intern | Semantic Soft Solutions, Chennai

Jul 2025 – Aug 2025

- Completed a second 4-week internship focused on backend web development, building on prior frontend experience with the same organization.

Web Development Intern | Semantic Soft Solutions, Chennai

Jan 2025 – Feb 2025

- Completed a 4-week internship covering soft skills, SDLC, HTML, website development, Python, and Tkinter-based desktop application development.
- Developed responsive web components and client dashboard UI modules using HTML, CSS, and JavaScript.
- Collaborated within an Agile team, using Git for version control and iterative feature delivery across sprint cycles.
- Debugged frontend issues, improving webpage responsiveness across multiple devices and browsers.

PROJECTS

FinAIMT — AI-Driven FinTech Ecosystem *(Personal Project)*

Ongoing

- Built an AI-driven financial co-pilot mobile app using Flutter, Clean Architecture, and Riverpod state management.
- Developed custom FL Chart data visualizations covering Indian financial assets across multiple asset classes.
- Implemented Section 80C tax calculation modules to support real-world personal income tax scenarios.

SecuritySentinel — AI-Powered Weapon and Threat Detection System *(Personal Project)*

Apr 2026

- Built a real-time threat detection system using YOLOv8 object detection and DeepFace facial and behavioral biometrics.
- Designed a Multi-Factor Threat Matrix for dynamic threat scoring, backed by a Flask-based monitoring service.
- Developed automated forensic alert notifications via encrypted SMTP and a Glassmorphism-based monitoring UI.

Goshin-Ryu Karate-Do Platform *(Freelance Project)*

Ongoing

- Engaged as a freelance developer to lead frontend and backend integration for a digital ecosystem managing martial arts operations, built with React.js and Node.js.
- Delivered responsive UI features and a scalable application architecture tailored to the client's growing member base and evolving requirements.
